

Eco school trip

On Tuesday some pupils from St Marys went to Cerne Abbas to talk to other eco Schools. The first activity was the owl pellets. They read a book about the owl. Then we took apart the owl pellets. It smelt. We found lots of bones and a skull. Then we went to the thinking room with another school. We all talked about why we should look after the earth. The event made us think a lot.

Then we had our lunch. There was a competition with the other schools. The school with the most recyclable and least non-recyclable things from their lunch box would win. We did not win, so St Marys need to cut down on the packaging in their lunch boxes. After we had lunch we played a recycle box game. It was the first one to empty their lunch box won. We did not win a game. Then we talked about

rubbish and looked at some pictures with animals. One of the pictures was of a seal with a piece of packing around its neck when it had been in the sea.

Lots of animals have died because of the rubbish in the sea. Then we looked at some toys that poor people have made and bags. Then we went home. It was a nice day!
