

## **ECO DAY**

**Today day eco club and the recycling people went to Cerne Abbas in Dorchester. When we got there some of the schools sat down in a big hall and talked about what they do in their school to do with recycling. After a while we went to take apart owl pellets and tried to find out what creature it was. Then we went to do some deep thinking about a book about a man who was selfish. After it was read to us we picked a scene that we liked the most and then us and the lady put out some words to do with the story. Next we wrote a question about the book. Then we played a game about recycling, and then we talked about rubbish. The game was that we had a lunch**

**box with three food items and we had to roll a dice and what number it landed on was how many spaces the counters moved and if it landed on a certain box you had to do what is said to do. After that we went to go back to school. On the way we saw the Cerne Abbas giant.**
