

## Eco day

Today we went to Cerne Abbas for an eco-trip. It was lots of fun!!!!!!

First we listened to other Dorset schools and what they all had achieved and what they are working for. We did lots more such as: looking at owl pellets which are food that owls can't digest and the things were mice and voles and rats. We also talked about rubbish and played a game where there was a counter and we had a lunch box. There were also squares that say the three r's. Next we had lunch and they gave us a tray for all the things we will not use again. They weighed the trays for a first second and third. Sadly we didn't. After lunch we did deep thinking which is where they ask questions and we have to answer and they also gave us a poster of different locations. We had to pick one and explain why we picked it. We had lots of fun. I wish we could go again.
