

Year 6 – Spring Term 2019

As the weather has improved we've endeavoured to take learning outside as much as possible. We have been converting measurements, calculating area and perimeter, measuring angles and acting.

We have been investigating inheritance, adaptation and evolution. As part of this work we have observed the features of animal specimens alongside living examples of brothers and sisters, or mothers and sons.

We visited Bridport Museum and explored their fossil and animal exhibits.

We particularly enjoyed the range of "hands-on" artefacts (and dressing up!)

The children are always welcome to visit and entry to the museum is free!

We have been well fed on exam days by the wonderful kitchen team!

Mel also gave up her afternoon to teach us how to cook apple and apricot filo parcels.
